

- final things to be done:**
1. Can you take the vine higher up the pillar. There are also wierd stringy “vines” hanging from the roof can they please be removed and add a somemore vine leaves.
 2. The pot on the left has an odd ridge in the middle can it just be smooth. Also that one branch on the far right has curved in really oddly.
 3. Can the stone wall behind be more natural stone as per example
 4. Can you remove the pot on the corner and can this all be move in so you can see more of the vineyard in the background.
 5. Please blur out the plants in the forground as per the image below
 6. Please can you make it more Sunsetting so we have the golden glow as per below
 7. We also preferred the puffier clouds that were catching the sunset colours and being reflected in the pool
 8. Possibly slightly less ripples in the water.
 9. Please chage the table with the champagne and chocolates to the one below. We love the french linen over the wooden tree stump and wine classes with white wine in and a cheese and crackers, or cheese and grapes. Dont worry about including a wine bottle
 10. For our longer story post / reel post image - 9:16 (1080 x 1920px) can you either just move the chairs and table or change the view point to the left so we have the image crop like the one on the next page. Please note we want the crop of the chair next to it.
- Can I ask that you give me a wider size option portait A size 2780 x 3508px (for 300dpi)
