PROJECT DESCRIPTION : THE STABLES - ERF 2377 – THEESCOMBE – PORT ELIZABETH

TENDER NO. : STEEL STRUCTURE – AS BUILT

Following our recent inspection, we confirm that the steel structure in question was neither designed by our firm nor subjected to a formal design review. However, based on our engineering judgment and experience with similar completed projects, we are satisfied to certify the superstructure, provided that its intended use (Low risk to public – Storeroom for plant/equipment) remains unchanged and that it will not be enclosed in the future.

It is important to note that the service life of the structure is expected to be limited due to areas of severe rust that were observed. These areas have been repaired to mitigate further corrosion. To ensure the ongoing structural integrity of the structure, we recommend that periodic annual inspections be conducted.

Yours faithfully

ALTRAMA (PTY) LTD
