The Treating Specialist*Important*

This report must be completed by a specialist and not a general practitioner

Before you perform the examination, please determine the client's identity with the help of a photographic proof of identity. Indicate on the report of your findings – what type of proof of identity was given.

The above-mentioned insured has required us to consider whether he/she qualifies for a disability claim.

The assessment of a disability claim is based on two main principals of impairment and disability. The assessment of impairment entails in practical terms, making a diagnosis and then determining on medical grounds which functions the person is still able to perform and which not. On the other hand, disability is a legal process assessing the extent of the person's impairment judged in conjunction with his/her job description the contract wording and personal factors such as education, experience, etc.

To assist us in making a justified decision, we have to be provided with a report regarding the impairment of this person. The decision regarding disability will be made by Sanlam Life Insurance Ltd ("Sanlam Life").

Please complete the report in accordance with the guidelines set out in the "Guidelines: Medical report on functional impairment" underneath after you have examined the person.

The insured is responsible for the costs relating to this consultation and medical report.
